

Risk Management Policy

I Purpose :

- (1) The purpose of this memorandum is to document the Risk Management Policy of the “GIFT Group”.

The main objective of this policy is to ensure sustainable business growth with stability and to promote a pro-active approach in reporting, evaluating and resolving risks associated with the business. In order to achieve the key objective, the policy establishes a structured and disciplined approach to Risk Management, in order to guide decisions on risk related issues. The specific objectives of the Risk Management Policy are:

1. To ensure that all the current and future material risk exposures of the company are identified, assessed, quantified, appropriately mitigated and managed.
2. To establish a framework for the company’s risk management process and to ensure GIFT Group implementation
3. To ensure systematic and uniform assessment of risks related with the project
4. To enable compliance with appropriate regulations, wherever applicable, through the adoption of best practices
5. To assure business growth with financial stability.

II Definitions:

- 1) “GIFT Group” for the purpose of this policy means Gujarat international Finance Tec-City Company Limited and its Subsidiaries.
- 2) “Risk” is any uncertain future situation or event, which could influence the achievement of GIFT Group’s objectives or realisation of opportunities, including strategic, operation, financial and compliance objectives.
- 3) “Risk Management” Risk Management is the process of systematically identifying, quantifying, and managing all risks and opportunities that can affect achievement of a corporation’s strategic and financial goals.
- 4) “Risk Strategy” The Risk Strategy of a company defines the company’s standpoint towards dealing with various risks associated with the business. It includes the company’s decision on the risk tolerance levels, and acceptance, avoidance or transfer of risks faced by the company.
- 5) “Risk appetite” is an expression of how much risk an organization is prepared to take. It can vary over time and from work area to work area. If the Company’s risk appetite is clearly articulated to staff, they can take this into account when making their decisions.
- 6) Committee means the “Audit committee”

III Underlying approach to Risk Management:

The following key principles outline the Company's approach to risk management and internal control:

- (a) The Board / Audit Committee ("The Committee") assumes responsibility for overseeing risk management within the GIFT Group with the inputs from Finance & Accounts Department as a coordination department for Risk Management (when there is an Audit committee; in other cases Board would be overseeing the risk management.)
- (b) While evaluating risk management of the companies within the GIFT Group, the Board / Committee recognize that they are exposed to a large number of risks which are inextricably linked to the entrepreneurial activities
- (c) The Committee should routinely identify and evaluate the risk to achievement of business objectives. This would include the regular assessment of both the significance and the likelihood of occurrence of the risks arising. Having assessed the significance and likelihood of the risks arising, a Risk Prioritization program should be established to assist the Audit Committee in addressing higher priority items.
- (d) An open and receptive approach to solving risk problems should be adopted by the Board / Committee
- (e) Business Heads and Functional Heads under guidance of Chief Executive Officer and support functionaries advise and implement policies approved by the Board / Committee
- (f) All staff members are responsible for encouraging good risk management practice within their areas of work

IV Role of the Board Committee

The Board Committee will be responsible for management of risks associated with the operations of the GIFT Group It will inter alia:

Set the tone and influence the culture of risk management within the company / group. This includes:

- (i) communicating approach to risk
- (ii) determining what types of risk are acceptable and which are not

(iii) setting the standards and expectations of staff with respect to conduct and probity.

- Determine the appropriate risk appetite or level of exposure for the company / Group
- Approve major decisions affecting the Company’s risk profile or exposure
- Monitor the management of fundamental risks to reduce the likelihood of unwelcome surprises

The Exhibit below shows an example of a risk management model. In this model, one can assess where a particular risk falls in terms of likelihood and impact and establish the organizational strategy/response to manage the risk:

Impact	Risk Management Actions			Level of Reporting
Significant	Considerable Management Required	Must Manage and monitor risks	Extensive management essential	Audit Committee *
Moderate	Risk may worth accepting with monitoring	Management efforts worthwhile	Management effort required	Managing Director & Group CEO
Minor	Accept Risks	Accept, but monitor risks	Manage and monitor risks	Risk Committee
	Low	Medium	High	
	Likelihood			

* Audit committee will present its observations to the Board

- Receive assurance that the preventable risks are being actively managed, with the appropriate controls in place and working effectively
- Periodically review the Company’s approach to risk management and approve changes or improvements to key elements of its processes and procedures.

VI Risk Management Process :

Conscious that no entrepreneurial activity can be undertaken without assumption of risks and associated profit opportunities, the Group operates a Risk Management Process /Framework aimed at minimization of identifiable risks after evaluation so as to enable management to take informed decision

Operationalization of the Framework is entrusted by Board to an Audit Committee which in turn is supported by a team comprising (i) Chief Executive Officer (ii) Heads of Business and Support Functions (iii) Risk Coordinator / Risk Champions. The tiered structure of the Risk Organization ensures uniform appreciation and understanding of the risk process and culture across the organization

Broad outline of the framework is as follows:

- (a) **Risk Identification**: Management identifies potential events that may positively or negatively affect a company's ability to implement its strategy and achieve its objectives and performance goals. Potentially, negative events and represent risks are assigned a unique identifier. The identification process is carried out based on a collegium approach so that an expansive risk identification covering operations and support functions are put together and dealt with.
- (b) **Root Cause Analysis**: Undertaken on a consultative basis, Root Cause Analysis enables tracing the reasons / drivers for existence of a risk element and helps developing appropriate mitigation action
- (c) **Risk Mitigation Plan**: Management develops appropriate responsive action on review of various alternatives, costs and benefits, with a view to managing identified risks and limiting the impact to tolerance level. Risk Mitigation Plan drives policy development as regards risk ownership, control environment timelines, standard operating procedure (SOP) etc.

Risk Mitigation Plan is the core of effective risk management. The mitigation plan covers:

- (i) Required Action
- (ii) Required Resources
- (iii) Responsibilities
- (iv) Timing
- (v) Performance Measures and
- (vi) Reporting and Monitoring requirements

Hence it is drawn up in adequate precision and specificity to manage identified risks in terms of documented approach (accept, avoid, reduce, share) towards the risks with specific responsibility assigned for management of the risks. This is an auditable document and an inter temporal comparison of the mitigation plan is expected to signal improving direction

- (d) **Risk Scoring**: Management considers qualitative and quantitative methods to evaluate the likelihood and impact of identified risk elements. Likelihood of occurrence of a risk element within a finite time is scored based on polled opinion or from analysis of event logs drawn from the past. Impact is measured based on a risk element's potential impact on cost, revenue, profit

etc. should the risk element materialize. The composite score of impact and likelihood are tabulated in an orderly fashion and the table is known as Risk Register (RR). The Company has assigned quantifiable values to each Risk Element based on the “Impact” and “Likelihood” of the occurrence of the Risk on a scale of 1 to 3 as follows.

“Impact”	Score
Minor (Mi)	1
Moderate (Mo)	2
Significant (S)	3

“Likelihood”	Score
Low (L)	1
Medium (M)	2
High (H)	3

The resultant “Action Required” is derived based on the combined effect of Impact & Likelihood and is quantified as per the summary below.

“Action required” i.e. (Impact X likelihood)	Score
Accept (A)	1 or 2
Manage & Monitor (MM)	3 or 4
Extensive Management Essential (EME)	6 or 9

A “Maximum Possible Score” is arrived for each of the broad categories depending upon the number of “Elements” under each of them.

The “Actual Score” of “Action Required” is then converted into a % of the “Maximum Possible Score”.

- (e) **Risk Categorization**: The identified risks are further grouped in to (i) Preventable (ii) Strategic and (iii) External categories to homogenize risks

- (i) Preventable Risks are largely internal to organization and are operational in nature. The endeavor is to reduce / eliminate the events in this category as they are controllable. SoPs and Audit Plans are relied upon to monitor and control such internal operational risks that are preventable.

- (ii) Strategy Risks are voluntarily assumed risks by the Senior Management in order to generate superior returns / market share from its strategy. Approaches to strategy risk is ‘Accept’ /‘Share’, backed by a risk-management system designed to reduce the probability that the assumed risks actually materialize and to improve the company’s ability to manage or contain the risk events should they occur.

 - (iii) External risks arise from events beyond organization’s influence or control. They generally arise from natural and political disasters and major macroeconomic shifts. Management regularly endeavors to focus on their identification and impact mitigation through ‘avoid’ / ‘reduce’ approach that includes measures like Business Continuity Plan / Disaster Recovery Management Plan / Specific Loss Insurance / Policy Advocacy etc.
- (f) **Risk Prioritization**: Based on the composite scores, risks are prioritized for mitigation actions and reporting
- (g) **Risk Monitoring**: It is designed to assess on an ongoing basis, the functioning of risk management components and the quality of performance over time. Staff members are encouraged to carry out assessments throughout the year.

Options for dealing with risk

There are various options for dealing with risk.

Tolerate – if we cannot reduce the risk in a specific area (or if doing so is out of proportion to the risk) we can decide to tolerate the risk; i.e., do nothing further to reduce the risk. Tolerated risks are simply listed in the corporate risk register.

Transfer – here risks might be transferred to other organisations, for example by use of insurance or transferring out an area of work.

Terminate – this applies to risks we cannot mitigate other than by not doing work in that specific area. So if a particular project is of very high risk and these risks cannot be mitigated we might decide to cancel the project.

Risk Reporting: Periodically key risks are reported to Board or empowered committee in the form of Heat Maps and Bubble Maps with causes and mitigations undertaken / proposed to be undertaken.

II Review of Effectiveness

Effectiveness of Risk Management Framework is ensured through periodical Internal Audits. These play an important validation role to provide assurance the Board / Audit committee that the critical processes continue to perform effectively, key measures and reports are reliable and established policies are in compliance

As the risk exposure of any business may undergo change from time to time due to continuously changing environment, the updation of the Risk Policy will be done as and whenever required.

Approval of the Policy

The Board will be the approving authority for the GIFT Group's overall Risk Management System. The Board will, therefore, approve the Risk Management Policy and any amendments thereto from time to time.

III Summation :

The above framework is proposed as a broad risk management policy of GIFT Group.
